KINGS OF CANNABIS

NEW

DEEP CANDY®

(CBD ONLY STRAIN)

40% SATIVA 60% INDICA THC: 0.3 - 0.6% CBD: 15% CBN: 0.5%

Proprietary High CBD,
low THC strain

8-9 weeks 650 g/m².

Amazing sweet sugary smell
and taste. A great smoke to
stay active the whole day while
enjoying flavorful cannabis.

8-9 weeks 400 g/plant.
2nd week of September.

Not yet introduced.

DESCRIPTION

The Deep Candy has an amazing sweet sugary smell and taste that will instantly remind you of your youth when entering a candy store or a fun-fair.

It produces some very resinous buds with a strong candy smell during the flowering phase and it can get very pretty colors towards the end of the cycle from red to dark blue depending the phenotypes and temperatures.

It is a cross of two low THC cannabis strains producing an average of 15% CBD for a THC level ranging from 0,3 to 0,5% THC. A great smoke to stay active the whole day while enjoying flavorful cannabis.

The flowering time is 8-9 weeks, the Deep Candy is a mid-sized plant that will stretch double it's size during the flowering stage.

Deep Candy produces a relaxing body effect that will give you a sensation of tranquility without any of the psychoactive sides therefore keeping a clear head the whole day.

EXODUS CHEESE AUTO CBD®

30% SATIVA 50% INDICA 20% RUDERALIS
